Dear Sir:

We acknowledge receipt of your letter of October 3rd, and wish to advise that the size of the diamond point used on both the diamond disc 150-threads-to-the-inch record and the Blue Amberol record was .003.

It is so long since we manufactured these and also so long since we made records that we are unable to conveniently get the engineers' drawings. We have given you the diameter of the point and it should be an easy matter for you to figure out the radius.

Very truly yours,
